

Terms and Conditions

Please Read Carefully

FULL POOL CLOSING INCLUDES

- ◆ Chemically treating the water with shock and algae inhibitor. (balancing not included—please see below)
- ◆ Winterization of the filtration system: pump, motor & skimmer.
- ◆ Blowing out lines (suction and return)
- ◆ Removing accessories (except diving boards)
- ◆ Installation of winter cover (additional covers extra)

NOT INCLUDED **can be arranged prior to closing for additional fee

- ◆ Leaf and debris removal **
- ◆ Vacuuming **
- ◆ Filter Grid Cleaning **
- ◆ Installation of more than one cover **
- ◆ Balancing chemicals
- ◆ Replacement of worn parts
- ◆ Winterization of hose bibs or fill spouts
- ◆ Heater Winterization (additional fee)
- ◆ Plugs, water bags, gizmos & blow out plugs (customer must leave poolside)

BEFORE WE ARRIVE

- ◆ Have your water professionally tested and balanced 3-7 days before closing
- ◆ Vacuum, brush walls and remove all leaves and debris. Vacuuming is not included. Pool will be closed "as is".
- ◆ Leave electric and water on
- ◆ Leave winter cover, securing devices, water bags, cover pump, plugs and blow-outs poolside.
- ◆ For Concrete, Gunitite & Plaster pools with tile you must have the water level lowered to 2-3 inches below the tile. A \$95 charge per hour will apply if water not lowered prior to our arrival. Liner pools should have water level at the middle of the skimmer.

AFTER WE LEAVE

- ◆ Remember to shut off any timers inside the house.
- ◆ To prevent rust & corrosion do not keep sanitizers and oxidizers stored near metal objects (ladder, handrails, bikes, etc.)
- ◆ Do not allow more than 2-3 inches of water to accumulate on top of solid covers. Water must be pumped off. Covers can be pulled into the pool if water on top is not pumped.
- ◆ Remember—pressure gauge, plugs, timer clips etc will be left in the pump basket

PLEASE BE ADVISED

A pool closing is simply a service to winterize your pool system. The Pool & Spa Place is not liable for damages due to freezing or normal wear & tear. The customer agrees to remove water accumulation on the cover & maintain proper water level in the pool over the winter. A low water level may cause considerable damage: causing liners to pop out of the bead, the liner to float or other damage to the pool liner, walls or surrounding concrete walkway. Have a good winter cover & cover pump. Rain water & snow can weigh a cover down and cause it to fall into the pool or cause water to be displaced from the pool without really noticing it. Be sure to check your pool water level over the winter. If you have a solid safety cover with an automatic pump, be sure to unplug the pump when the hose is frozen or the pump is covered with ice and snow. Allowing the pump to remain pumping with a frozen hose can cause the motor to burn out.

Cleaning the filter thoroughly with Strip Kwik, Kleen It or SoftSwim Filter Cleaner before closing the pool is recommended. Sand filters should be done prior to the closing. DE filter grids should be removed from the filter tank and soaked in a large pail with one of the cleaning solutions.

All plaster, gunnite, and concrete pools – we strongly recommend adding one quart of Stain & Scale Control to your closing order to prevent calcium/scale build up.

If you have a regular mesh cover we recommend that you add a quart of Back Up Algaecide (Algae All 60 if you have an attached spa) every six weeks to pool to reduce the chance of algae formation. For Solid or SmartMesh Covers algaecide is not necessary but pool water must be balanced one week prior to closing.
